

Summary

Major Issues: Tires, shocks and struts

Moderate Issues: Oil collecting on bottom of oil pan

Minor Issues: CV axle boot coming off on front driver side

Listed Price: \$2 500

Blue Book Value: \$2 924

Additional accessories: None to note

Summary:

Overall, it appears to be a good car. There are some items to address: the tires, the oil pan oil leak, and all shocks and struts. The car has one set of winter tires and that's all. The car would need four tires (all-season or winters) at the earliest convenience but would be okay for this winter. The oil leak is enough to note it as a fail but not enough to be concerned for immediate repair. The oil leak seems manageable with top-ups, especially for the price of the car. The shocks and struts are old and have a lot of bounce to them. The shocks and struts are manageable for driving around the city but would be a bigger concern for longer trips at higher speeds.

Exterior Condition

Part	Status	Notes
Body Panels	Pass	Has some scratches, but no concern
Paint	Pass	Clear coat peel on roof, no concern
Rust	Pass	Rear Quarter Rust. Not Structural only cosmetic
Glass	Pass	One small crack and 2 chips but windshield integrity is okay
Mirrors	Pass	Power mirrors work
Headlights	Pass	The headlights are sun-damaged but functional
Taillights	Pass	Functioning
Turn Signals	Pass	Functioning
Wipers and fluid	Pass	Functioning
Tires	Fail	Mismatched winter tires. Front Passenger was low on air. For the price of the car it's okay for one winter season but not recommended
Wheels	Pass	Steel wheels

Interior Condition

Part	Status	Notes
Seats	Pass	No obvious stains, no concern
Seatbelts	Pass	Functioning
Dashboard	Pass	No concern
Warning Lights	Pass	Tire pressure light on, triangle light on. Triangle light goes on with TPMS so no concern here
Heating and A/C	Pass	Heat and A/C work
Infotainment and Radio	Pass	Has AUX but unable to test at this time
Speakers	Pass	Functioning normally
Windows	Pass	All 4 power windows work
Locks	Pass	All 4 power locks work
Odors	Pass	Smelled fine, no concern
Airbags	Pass	No concern
Brake, Gas and Clutch (if applicable) Pedal Feel	Pass	Normal operation
Emergency Brake	Pass	Functioning, no concern

Engine Bay

Part	Status	Notes
Oil Level and Condition	Pass	Oil condition looked good, It looked fairly new and was at the correct level
Oil Leaks	Pass	Minor oil seepage just below valve cover
Coolant	Pass	Sealed coolant system, but car held operating temperature
Brake Fluid	Pass	Fluid quality and level was good
Power Steering Fluid (if applicable)	Pass	Missing cap but fluid looks okay and power steering works
Belts	Pass	Good condition and correct tightness
Hoses	Pass	No concern
Battery	Pass	Voltage is very slightly low, but the car doesn't get driven much so this is normal
Alternator	Pass	Looked fairly new, no concern
Engine Mounts	Pass	No concern
Exhaust	Pass	No leaks, no concern

Undercarriage

Part	Status	Notes
Frame	Pass	Surface rust, structure okay
Subframe	Pass	Surface rust, structure okay
Engine	Fail	Oil leak on oil pan
Transmission	Pass	CVT transmission, went into drive and reverse fine
Power Steering	Pass	No concern
Exhaust	Pass	No concern
Brake Lines	Pass	No concern
Fuel Lines	Pass	No concern

Brakes, Suspension and Steering

Part	Status	Notes
Front Pads	Unknown	Steel wheels blocked view of pads
Rear Pads	Unknown	Steel wheels blocked view of pads
Rotors	Pass	Rotors are old and rusty but look functional
Strut and Shock Condition	Fail	Definitely all worn as the car bounces under pressure
Bushing Condition	Pass	Cracked and old but working
Sway Bar	Pass	No concern
Tie Rod Condition	Pass	No concern
Power Steering	Pass	No concern
Axle	Pass	Boot loose on driver side and leaking a little but not concerns right now
